

Study Tour to Israel – Innovation in Digital Health

Hospitals that have already started the digital transformation act as a hub for healthcare innovation - this is not a future vision. Israel is one of the pioneers when it comes to digitalization in healthcare. Their concept is based not on digitizing individual processes but on completely rethinking healthcare services. Doctors, scientists and start-ups collaborate to develop remote care technologies, AI tools and robotics in Hospital Innovation Centers.

From November 7th to 9th, 2022, you will have the opportunity to visit leading hospital innovation centers in Israel to learn about their innovation and digital transformation.

The participants of the study tour...

- » Get to know a healthcare system that has strongly promoted digitalization and thus acts as a pioneer in terms of digital innovation.
- » Understand which drivers influence digitalization in healthcare.
- » Learn from the best and bring exciting inspiration back to Switzerland.
